| <i>“Super off-peak hours” Monday – Sunday, 11 pm to 5 am EDT/EST</i> |

JACKSON COUNTY RURAL ELECTRIC MEMBERSHIP CORPORATION

Schedule "A" – Basic Service

TERMS AND CONDITIONS OF SERVICE

Energy Charge – An account will be billed Energy Charges according to its choice of *Year-round pricing*, *Prepaid pricing*, or *Time-of-use pricing*. Every twelve (12) months an account is eligible to select a new Energy Charge Option. An account that elects *Time-of-use pricing* for the first time may elect a different option upon completion of a six (6) month initial trial period.

If a service location has changed hands and been billed under multiple Energy Charge Options during the previous twelve (12) months, REMC reserves the right to require a new account to begin service for the initial twelve (12) months under *Year-round pricing*.

Metering and Billing – Appropriate metering will be installed by REMC. At times reasonable estimates will be made due to the unavailability of needed billing determinants. kWh usage may be prorated between billing rate periods.

Minimum Monthly Charge - The minimum monthly charge shall be the Basic Service Charge.

Levelized Monthly Payment Plan – Jackson County REMC will agree to bill a residential consumer each month a levelized amount if they meet basic credit guidelines. The levelized amount will be calculated using the previous twelve (12) months usage divided by twelve to determine the average monthly usage for that service location. The levelized billing amount will be recalculated and updated each month. REMC shall have the right to make new estimates and compute a new monthly billing level based on actual usage at any time during the year and may discontinue such billing if a member fails to maintain a good payment record.

Terms of Delivery – The charges under each rate schedule are based upon the supply of service through a single delivery and metering point, and at a single service voltage. If service is supplied to the same consumer through more than one point of delivery or at different service voltages, the supply of service at each delivery and metering point and at each different service voltage shall be separately metered and billed. Each family residential unit shall be served separately. Service is supplied in accordance with rules prescribed by the Indiana Utility Regulatory Commission and also the Bylaws and the Rules and Regulations of Jackson County REMC.

Limitations on Connected Equipment – Jackson County REMC may require corrective measures or devices for any motor or other connected load that in the opinion of REMC will cause undue voltage fluctuations to other customers. Operation of any motor in excess of ten (10) horsepower must be approved by REMC and may continue only at the discretion of REMC. If three-phase service is supplied, all motors in excess of ten (10) horsepower shall be connected three-phase.

Consumer Facilities – All equipment and facilities beyond the metering point shall be furnished and maintained by the consumer.

Resale – No resale of power purchased under these schedules is permitted.

Line Extension Cost – Line extension policies may require payment of extension costs if added facilities are required solely to provide requested service. All necessary equipment will be furnished, owned, and maintained by REMC.

Late Payment Charge – If a bill is not paid by the due date, it shall become a delinquent bill and a late payment charge may be added in the amount of ten percent (10%) of the first three dollars (\$3.00) and three percent (3%) of the excess of three dollars (\$3.00).

⁽¹⁾ See Appendix "A" for energy charge adjustments

⁽²⁾ Time of Use pricing cannot be combined with R26 Purchase Offer R

⁽³⁾ Excludes Independence Day

⁽⁴⁾ Excludes Christmas Day, and New Year's Day
